COMMON CORE CATALOG
10/16/16

COMMON CORE K-5

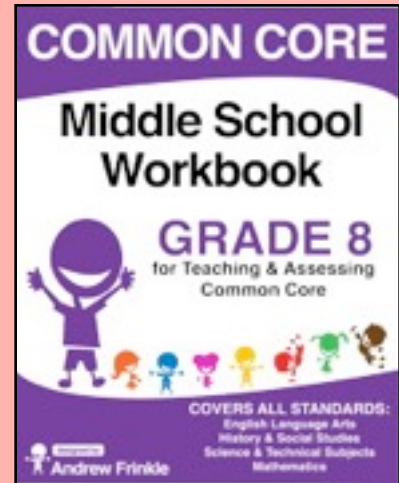

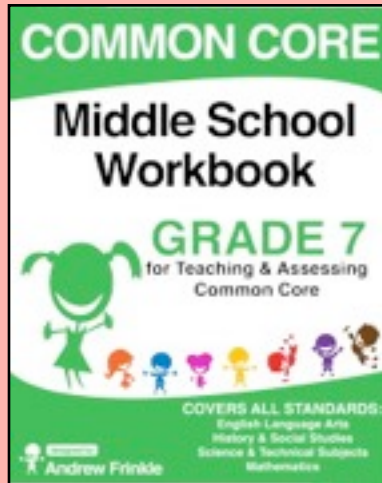

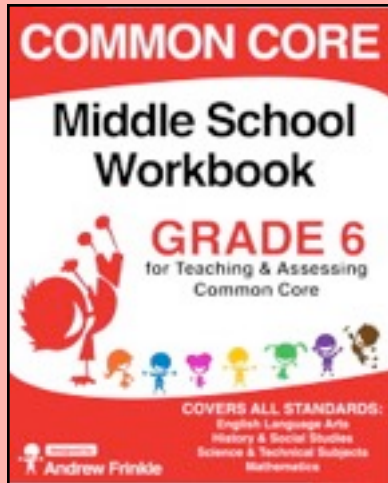

These books contain copies of all grade level standards for ELA & Math. Additionally, there are blank worksheets or assessments for each standard. It's a plug-and-play system. The worksheet layout is designed for you. You just put your lesson materials into the appropriate boxes and photocopy the page for your students!

Get a hardcopy of the book on Amazon, or get a digital PDF download from TeachersPayTeachers or TeachersNotebook. If you have a digital copy, it makes it easy to use a document camera and whiteboard with these resources.

Another advantage to this series is that the standards are ON the worksheet pages, with the full standards codes AND all the language of the standard, so you don't have to go back and look up the standards to see exactly what you are supposed to be teaching and what points you need to get across.

COMMON CORE 6-8

These books contain copies of all grade level standards for ELA, Math, History & Social Studies, and Science Subjects / Technical Subjects. Additionally, there are blank worksheets or assessments for each standard. It's a plug-and-play system. The worksheet layout is designed for you. You just put your lesson materials into the appropriate boxes and photocopy the page for your students!

Get a hardcopy of the book on Amazon, or get a digital PDF download from TeachersPayTeachers or TeachersNotebook. If you have a digital copy, it makes it easy to use a document camera and whiteboard with these resources.

Another advantage to this series is that the standards are ON the worksheet pages, with the full standards codes AND all the language of the standard, so you don't have to go back and look up the standards to see exactly what you are supposed to be teaching and what points you need to get across.

- Expressions & Equations
- Functions
- Geometry
- Statistics & Probability

SCIENCE & TECHNICAL SUBJECTS

HISTORY & SOCIAL STUDIES

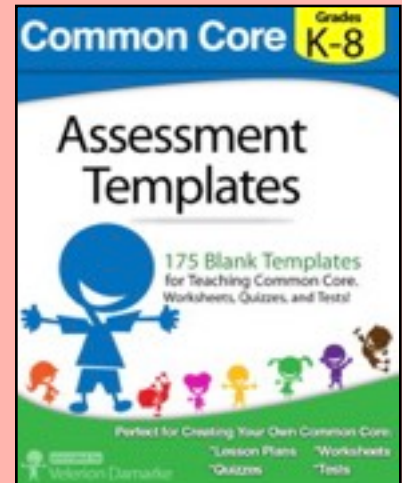

Do you just need the standards? Tired of looking them all up? Get every subject and every standard for grades K-8.

ASSESSMENT IN CCS

Common Core Assessment Templates was developed to fill a hole that I saw in most common core workbook programs. Most of them have a lot of worksheets and other materials that might be good for one or two uses, but what if you needed more? Would you buy another company's workbook so you didn't have to keep redoing the same stuff? Probably not. Would you just make up your own stuff? Probably.

So, if you're going to make your own stuff, what are you going to do it with? How will you do it? What would the forms look like?

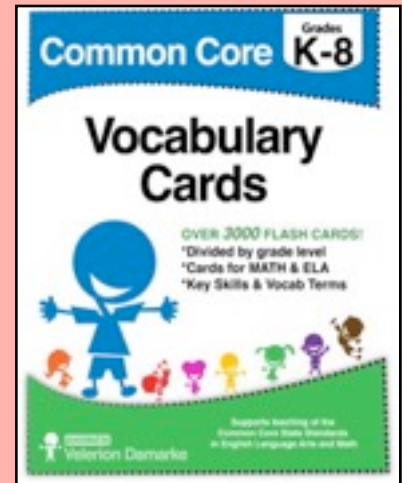

I created a set of standardized forms that do-it-yourselfers could use to make as many tests and quizzes and worksheets as they wanted. I came up with a set of 175 customizable forms for every conceivable use in ANY subject, although language and math were definite focuses. These designs are flexible and very reusable. They look great together, too! No more random, unprofessional, non-matching forms you throw together. These are a collection of forms you can use, reuse, and adapt to any subject, any time, any year!

VOCABULARY IN CCS

Common Core Vocabulary Cards was developed as a companion tool to help teachers get their students through a year of Common Core. In making literally thousands of flash cards, I've helped focus each grade level toward key words, areas of concerns, and foundational skills for each subject area at that grade level.

Using this program in any common core classroom, regardless of whether or not you use my assessment templates, you can see what you need to learn THIS year, what you were supposed to learn LAST year, and focus on what is coming NEXT year!

These are a tool you are going to use and reuse every year, and it really helps out with Common Core Assessment Templates or any other Common Core program!

WHERE TO ORDER:

PURCHASE COPIES:

Amazon Store - www.amazon.com/author/andrewfrinkle
